

## **SAMPLE REQUIREMENTS**

We will assess the quantity and quality of the DNA/RNA you submit upon receipt using sensitive/specific techniques available (Qubit for concentration measurements, fragment analysis for size distribution and checking for degradation) and inform you of the results before proceeding. For libraries prepared yourselves ('ready-prepared libraries'), see below.

Please contact us if you would like to discuss using any protocol other than those listed above. For any queries please don't hesitate to contact the team.

Sample requirements listed below are recommendations from kit suppliers however for samples that fall below this we can advise of next steps.

For 1-24 samples please have samples in single tubes or plate format.

For 25-96 samples please have samples in plate format.
